

Motul and Team West-Tec develop into 2010

Team West-Tec has extended its successful relationship with Motul and will now feature the oil company's logos boldly across both its British International Formula 3 team and its highly successful European Formula 3 Open team.

2009 saw Team West-Tec's British F3 cars gain much positive comment for the striking Motul livery, which will be enhanced for 2010 as the team strives for further success after another winning season in 2009.

A specialist in the design and manufacture of high-tech lubricants and a synthetic lubricant expert, Motul are heavily involved at the highest level of motorsport – the ideal testing ground for developing and perfecting products for the public market. Pace Products are the UK Importer of the automotive Motul range.

~

John Miller, Team West-Tec: We are absolutely delighted to be able to continue and build our successful team sponsorship with Motul, as they are truly one of motorsport's iconic brands.

Such arrangements allow us to be able to keep the driver budgets to a minimum and also provides us with Motul's superb range of products, as well as their analysis and laboratory facilities which should allow us to maximise performance on track.

Gareth Burnett, Pace Products: Last year we decided to start a new programme with Team West-Tec, with an eye on a good, long-term relationship. Therefore it was only natural to continue and expand on that relationship for 2010 when we look forward to seeing the team add to their record of Championship wins.

Romain Fabre, Motul: We were very pleased to start our association with Team West-Tec in 2009 and the cars looked fantastic with the Motul logos. We are looking forward to seeing them race to success in 2010.
